An Invitation to You!

This year the American Iris Society is holding the annual meeting in Salt Lake City, Utah. To our friends in all parts of the country—Don't forget the convention — and do come and see us while you are in Utah. Every one is welcome at Mission Bell Gardens —you may browse around by yourself, or we will be glad to join you.

This season we have added over fifty of the very newest and best Iris to our garden. As has always been our practice, we have eliminated some twenty or thirty of the older kinds — thus keeping our collection of over 400 varieties, up-to-date. We are hopelessly in love with the exciting hobby of hybridizing, and will welcome your opinion of our "Dream Children".

We wish to thank you for the orders, which have made it possible for our "Garden to Grow"! And hope your garden will display great beauty this season, and that each new variety will meet with your expectations —

Member of American Iris Society

Member of Utah Iris Society

Member of Rainbow Iris Society

Introducing —

MISSION GLORY (M. Hamblen) Mid-season-Late. (Bryce Canyon x Garden Glory). A rich glowing red-brown self. Its lovely classical form and smooth finish clearly showing the heritage of its pollen parent. The closed standards and wide flaring falls have an unusual beauty that is enhanced by its heavy substance. Its large blooms are carried and well placed on 38-inch stalks **\$20.00**

MISSION SUNSET (M. Hamblen) Mid-season. (Tobacco Road x Casa Morena). From the same parents that produced Argus Pheasant — this is a brighter golden-brown, with a coppery sheen which makes it an outstanding garden subject. Of good substance — its large full flowers resist rain and wind and do not fade. With tall, well-balanced stalks it is vigorous and a rapid grower. **\$5.00**

And Presenting —

THREE NEW IRIS BY TELL MUHLESTEIN

CONVENTION QUEEN (Muhlestein) ML (Salmon Shell x Pink Fulfillment). Very large, wide, heavily laced peach-pink with excellent substance. One of the best from this cross that gave some true pinks with pink beards. This should be an excellent parent. Heavy 40 inch stalks. H.C. '53 No. 51-51 D.
..... Net **\$35.00**

JUNE MEREDITH (Muhlestein) ML (Party Dress x Pink Fulfillment). This lovely rich pink has captured much of the charm of its parents. A complete self with a heavy, long deep tangerine beard. The standards are closed — the substance very good. Height 36 inches. H.C. '53 No. 51-11D.
..... Net **\$35.00**

PINK ENCHANTMENT (Muhlestein) EM (Raspberry Ice Cream x 49-11, sister to Pink Fulfillment). Of this one, Mr. Muhlestein says, "This is the deepest pink I have bred to date. It is proving a remarkable parent for deepening the pink color. The flowers are not as large as the other pinks I am bringing out this year, nor is the form as near perfection, but is a complete pink self with semi-flaring flowers that have a most rich, bright cerise beard. Very limited stock, but the hybridizers want it badly, so I will release a few." No. 51-4.
..... Net **\$35.00**

Orders for these three pinks may be placed with Tell's Iris Gardens, 691 East 8th North, Provo, Utah.

(Send for Tell's Hybridizer's Handbook and catalog, complete with pedigrees—25c

TALL BEARDED IRIS FOR 1954

TERMS OF SALE

Mail orders — Cash Please — Check or money order. All orders of \$5.00 or more will be Prepaid, orders amounting to less than \$5.00, add 35c extra for postage.

Local Customers — Thirty per cent of sale will hold the order, you will be notified, by mail, when your Iris are ready.

SHIPPING DATES

Iris will be shipped from June 15th up to October 1st. Early planting will allow your plants to obtain a full summer's growth. We have found that, although later digging gives us larger Rhizomes, early planting gives the best results. Orders will be filled in sequence as received, however, we will comply with requests for special shipping dates so far as possible.

GUARANTEE

GUARANTEE — All Iris true to name, free from disease and guaranteed to live and grow for you.

EXTRAS — EXTRAS — EXTRAS

CHOOSE YOUR OWN EXTRAS — On orders of \$5.00 to \$10.00, you may choose an additional 25% in Iris value. — For \$5.00, you select \$6.25 worth of Iris.

On orders of \$10.00 or more, you may choose an additional 50% in Iris value. — For \$10.00, you select \$15.00 worth of Iris. Varieties preceded by a star (*) are in short supply and may not be chosen as extras.

We do not make collection offers and therefore make this discount to our customers. —and we like to be generous with extras, and therefore ask that you list some of your favorites, so that we will not give you something you already have.

IRIS TERMS

AMOENO—White or near white standards and colored falls.

PLICATA—Stitched or stippled color on white or yellow ground.

VARIEGATA—Yellow standards and dark falls.

BLEND—Combination of two or more colors.

SELF—Uniform color.

BITONE—Two tones of the same color.

SUBSTANCE—Thickness of petals.

JOIN THE AMERICAN IRIS SOCIETY

Every one interested in growing Iris should join the American Iris Society. The four bulletins each year keep you up to date on new varieties, Iris culture, hybridizing, etc. Dues are \$4.00 yearly. You may send your order directly to —

THE AMERICAN IRIS SOCIETY

3902 Hillsboro Road
Nashville 12, Tennessee

Or we will gladly send your membership in for you, and if included with a \$5.00 Iris order will give you \$2.50 worth of Iris — in addition to the extra 25% mentioned before. For \$9.00, you get a membership in the A.I.S. and \$8.75 in Iris!

This offer expires July 1st.

DYKES MEDAL WINNERS

The Dykes Medal is the highest award an Iris can receive. To be eligible an Iris must have first received Honorable Mention (HM) and also the Award of Merit (AM) from the American Iris Society.

1953—Truly Yours

IRIS PLANTING AND CULTURAL DIRECTIONS

WHEN TO PLANT. For best results plant June through September. Early planting establishes the new Iris plants before winter. This is the time to reset clumps of Iris that are crowded, generally clumps 3 to 4 years old.

WHERE TO PLANT. The ideal location for your Iris is a sunny, well drained position. Sunshine at a minimum half days; Iris will not do well in the deep shade. No water should stand in your Iris beds. Raise beds slightly above the level of your garden paths if necessary.

DEPTH TO PLANT. Place your rhizomes just below the surface of the ground with the roots well spread out underneath so the rhizome is within reach of the warmth of the sun's rays while the roots beneath are in moist (not soggy) soil. Be sure to firm the soil tightly around each rhizome when planting. Follow ordinary good garden practice of watering and setting soil on newly set plants, of course.

DISTANCE APART. Depends on your particular plans. Generally Iris are planted from eight inches to two feet apart. Closer plants are for immediate effect and will need thinning sooner. Plant three of a kind to give an immediate clump effect, in a triangle with the toes of the rhizomes pointing inward. Place eight inches apart. Planted two feet or more apart they may be left for longer period of time.

FERTILIZATION. Iris will thrive without feeding but will respond to its application. In the matter of fertilizers, garden sense should be used in liberal quantity. In the preparation of your new Iris bed, spade in a good application of compost below the roots. Then an application of a well balanced fertilizer applied as a top dressing dusted around and in between the plants in early spring or very late fall is desirable. Steamed bone meal and super-phosphate are fine top dressing materials.

CULTIVATING. Do it shallowly. Iris feeding roots are very near the surface. Keep your Iris free of weeds and do not allow neighboring plants to encroach upon them. Remember, they should have sunlight right down to the rhizome. Remove the outer leaves as they begin to brown. At all times keep litter, old Iris leaves, grasses, etc., away from the rhizomes. Clean cultivation is the finest precaution for Iris troubles.

1954 Meeting of American Iris Society

"This Is the Place"

SALT LAKE CITY — MAY 26, 27, 28 & 29
